It is with pleasure that I share our positive experience working with Aegis Software. Their consultants have supported VDD in building our data platform in Microsoft Fabric/ Power BI, covering both the underlying infrastructure and the implementation of CI/CD processes.

We particularly value their professional approach, responsiveness, and ability to translate complex technical topics into practical business outcomes. Based on our collaboration, I can confidently recommend them as a reliable partner for organizations looking to leverage the full potential of Microsoft solutions.

Sincerely,

Rik de Gier
Business Unit Manager, BI Technology
